## Sliding/Folding for Exterior/Patio Doors

### Al Fresco

**Al Fresco allows you to open up your home effortlessly, instantly expanding your dining and entertaining areas.**

Whether you are located inland or by the sea, Häfele Al Fresco offers complete weather protection and is totally corrosion resistant. Stainless steel hinges, 316 marine grade cast stainless steel and stainless steel precision bearings are standard features of Häfele Al Fresco. The Pivot blocks, hanger bodies and bottom guides are all cast from 316 stainless steel for maximum strength and corrosion resistance. Utilized with wood doors, Häfele Al Fresco is the ideal system for opening up dining and entertaining areas in homes, restaurants, hotels and resorts.

#### **Stainless Steel Hinges**

Manufactured from 3 mm thick stainless steel, Häfele Al Fresco mortise and non-mortise hinges are available in three finishes: brushed satin stainless steel, polished stainless steel and titanium gold. Titanium gold looks like brass but offers a substantial improvement in corrosion resistance for an easy care finish that will remain tarnish free for years.

## Sliding/Folding for Exterior/Patio Doors

### Al Fresco

#### Capacity

Häfele Al Fresco is available in two weight options, 45 kg. (99 lbs.) for general residential and 75 kg. (165 lbs.) for larger or double-glazed applications.

The wheels are grooved to run on convex rails within the track: this is the optimum design for hangers subjected to side loads. Resistance to movement is further reduced on Häfele Al Fresco 75 by the introduction of 5 high speed precision bearings, four taking the vertical forces with the fifth opposing the side load.

#### Concealed Channel

Häfele Al Fresco bottom channel is concealed underneath the door leaves, for greater aesthetic appeal, and making it less prone to filling with rainwater.

Polypropylene outperforms traditional materials such as brass and aluminum for durability, low noise emission and corrosion, making it the first choice for the Häfele Al Fresco lower guide channel. Aluminum and brass channels are also available if desired.

To withstand the weight of heavy doors the guide system includes 2 double sealed precision stainless steel bearings securely riveted onto the 316 marine grade cast stainless steel body.

### HAWA–Assembly Wedge

- Used in conjunction with **HAWA–Junior 80/B**, **HAWA–Junior 120/B** and **HAWA–Silenta 150/B**
- For mounting of sliding doors that are recessed into the ceiling
- Allows sliding doors to be hung and removed from track without dismantling the door jambs or trim.

#### Mounting Information:

- When used for a pocket door application either the cover panel has to be designed so it can be removed or a removable 100 mm (4") wide stop strip has to be mounted on the lock side
- The sliding door should only reach 5 mm ( $\frac{1}{8}$ ") into the ceiling or the top jamb
- When closed, the sliding door should not protrude more than 50 mm (2") into the pocket
